Important safety instructions

For your own safety, please read the following important safety instructions carefully before attempting to connect this unit to the main power supply. They will enable you to get the best performance from the unit.

1.Read the instructions.

2.Keep the instructions.

3.Heed all warnings.

4.Follow all instructions.

5.Do not use this product near water.

6.Clean only with dry cloth.

7.Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

8.Do not remove the casing of this product.

9.Only use this product indoors. Do not expose the product to water, rain or high humidity.

10.Keep this product away from direct sunlight, naked flames or heat.

11.Do not install near any heat sources such as radiators, heat registers, stoves, or other electrical equipment(including amplifiers) that produce much heat.

12.Do not place any other electrical equipment on the product.

13.Do not place any sources of danger on the product(e.g. objects containing liquid, burning candles)14.This product includes batteries. Please refer to safety and disposal instructions for batteries in this user manual.

15.Unplug this product during lightning storms or when unused for long time.

16.Refer all servicing to qualified service personnel. Servicing is required when the product has been damaged, such as the power supply cord, damaged plug, liquid spillage, objects dropped on the unit, exposure to rain or moisture, does not operate properly, or has been dropped.

WARNING

- Using headphones at a high volume can impair your hearing. This product can produce sounds in decibel ranges that may cause hearing loss for a normal person, even for exposure less than a minute. The higher decibel ranges are offered for those that may be experiencing some hearing loss. Over time your hearing 'comfort level' adapts to higher volumes of sound, so after prolonged listening, what sounds 'normal' can actually be loud and harmful to your hearing. To guard against this, set your volume to a safe level.
- Loudspeakers: Before making any connections to loudspeakers, make sure all power is turned off and only use suitable interconnects.
- Only use attachments/accessories specified and supplied by the manufacturer.

FCC regulations

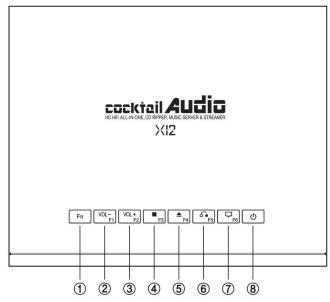

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER AUTHORITY TO OPERATE THE EQUIPMENT.

FCC This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy. If not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

2-2. Install AAA batteries into the remote control.

Open the battery door and insert the batteries.

2-3. Optional items, WiFi USB dongle

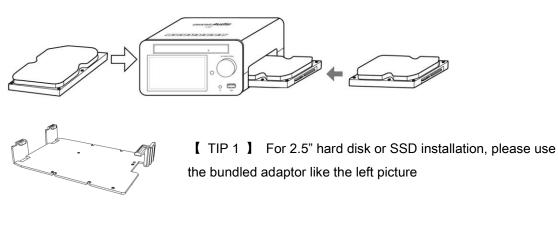

If you purchased optional items, the WiFi USB dongle, it looks like below.

2-4. X12 purchased without storage.

You need a 3.5" or 2.5" SATA hard disk or SSD, and install it into the X12 like below picture and format it. For formatting of the installed storage into X12, please refer to the 5-7-6. Format Storage (Page 34)

2-4-1. HDD installation

2-4-2. HDD Format

※ Refer to the 5-7-6. Format Storage (Page 34)

2-5. X12 purchased with an internal storage installed.

Check whether the storage is formatted, or not. If the storage is not formatted, please format it according to the 5-7-6. Format Storage (Page 34)

3. Connection

3-1. Power connection

Connect power to the X12 via the power inlet and switch on the rear of the X12.

3-2. External devices Connection

Refer to the rear view on page 9. Various devices can be connected to X12 like below according to

your purpose.

- Speaker Out terminal (80hm) : Bookshelf speaker or floor standing (power load) speakers
- Digital Out (Toslink, Coaxial): External DAC, etc
- Analog Out (RCA, R/L) : External amplifier, etc
- USB Host ports: WiFi USB dongle, external USB devices, etc

4. Turn On and Start

4-1. Wizard Setup (Setup Assistant)

Without HDD installed; if you are installing the HDD you will meet the Setup Assistant (Wizard Setup) as shown below. Switch the unit on at the rear of X12 and then power it on with the remote controller or the power button on the front of the X12.

Select OK and confirm with the OK key to start Wizard Setup. If you want to run the set up after booting up, you can select CANCEL at the 1st step.

🗄 Network	🔡 Time
None	Time Format

※ NOTE: Please remember to check this setting first when you see 'Query Error' on the screen in trying access to your music DB. For example, you will see 'Query Error' on the screen when you try accessing your Music DB of internal (installed) HDD with Music DB storage set to USB.

X When you use an external USB hard disk, please make sure to supply Power to the external USB hard disk in case the external USB hard disk is designed originally to connect to a Power supply.

5-1-5. Recovery

It is possible for damage or errors to occur on the album or files in the Music DB when you run several functions like; 'Rename, Delete, Copy to DB, or CD ripping' etc. If there are errors in the Music DB, the X12 may not play the files properly or may not rip CDs properly. The Music DB Recovery function will help to clear these problems.

5-1-5-1. How to run Music DB Recovery function

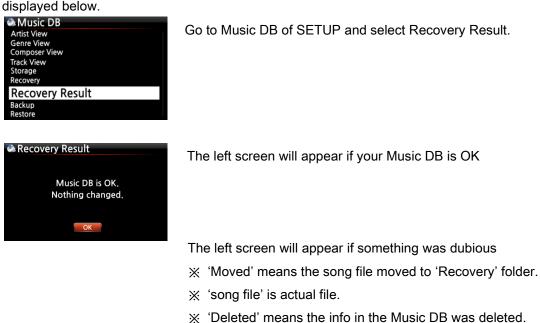

① Go to the Music DB. ② Select Recovery and press the OK key.

※ It will take some time to start and finish if your Music DB is quite large.

5-2-1. Bit Rate and Quality

You can select bit rate and the quality level for ripping to MP3 files.

There are two (2) items.(This is for ripping a CD to an MP3 file)

- Compressed Rate : 128K / 192K / 320K [default] 192K
- Quality level : Excellent / Best / Good / Fast / Very fast [default] Very fast

Select one of the above options and confirm with the OK button on the remote control.

[TIP ①] The time required to rip a CD to MP3 format based on each quality level option is shown below.

Option of quality level	Normal playing time	Required time to convert to MP3
Excellent		X 1.5 (150%)
Best	The time required to	X 1.08 (108%)
Good	play music in CD	X 1 (100%)
Fast	normally.	X 3/4 (75%)
Very fast[Default]		X 1/3 (33.3%)

XQuality level affects on the MP3 and Ogg ripping in view of sound quality, and on the FLAC ripping in view of file size.

【 TIP ② 】 Estimated Storage capacity

CD Ripping	option	500GB HDD	1 TB HDD	2 TB HDD	4 TB HDD
WAV(uncon	npressed)	650 CDs	1,300 CDs	2,600 CDs	5,200 CDs

% How to see the folders of the X12 hard disk on your PC screen (based on Window 7)

- ① Click the 'START' icon on the left/bottom on your monitor.
- ② Select 'Computer' and click it.
- ③ You may see 'Network'

④ Click 'Network', then you may see all servers (The X12 default host name is X12) connected to local network.

- (5) Select 'X12' and click it.
- ⁽⁶⁾ You may see the two folders, LocalStorages and MusicDB.

※ WARNING : You must NOT access to the MusicDB folder related to database. If you delete or edit something inside of the folder, it will make MusicDB serious trouble.

5-5-2 Network Sharing (Samba Client)

You can connect the X12 and the storage devices in the same network. If you want to stream the file in remote devices and play it with the X12, you need to do 'network sharing' first as below.

1) How to add 'shared folder'

6. CD Database (Music DB)

6-1. What is the CD database (Music DB) of the X12?

The Music DB is a database of the music loaded (ripped) to the X12 (onto the storage), you can edit the CD information of each track such as the title, album, artist, year and genre, that are stored in the Music DB. You can search any of your music easily by title, album, artist, year or genre.

When the X12 is connected to the internet/network the CD information can be retrieved from the FreeDB database on the internet. A USB keyboard or the supplied remote control can be used to edit the tag information of the CD (which you may find incorrect or incomplete) that will eventually be stored on the X12 Music DB.

6-2. What is FreeDB?

FreeDB is a database used to look up CD information using the network (Internet). This is done by the X12 (using a FreeDB aware application) that calculates a (nearly) unique disc ID for a CD inserted into your optical drive. As a result, the X12 displays the artist, album, track list and some additional information. Since all information is submitted by FreeDB users, there are likely to be several different sets of information for the same CD or no information for a certain CD.

7. CD Loading (Ripping)

All music that you load (rip) onto the X12 will be stored in hidden folder (the name of the folder is .DB), that cannot be seen.

【 TIP ① 】 It is recommended that you connect to the internet to make use of the FreeDB when loading (ripping) your CDs.

7-1. When the X12 is connected to network (Internet)

Make sure to connect X12 to network (Internet) before inserting CD into X12.

Insert CD into X12.

② After a while, the screen will show up track list

【 TIP ② 】 If the X12 is connected to the Internet, but displays the track lists instead of the actual music titles, eject the CD & re-insert it into the optical drive again. If the inserted CD tag info does not exist in the freedb server, the screen will show up the track number only, instead of actual music titles.

③ For CD loading (ripping), press the MENU button.
Then the below popup screen is displayed showing "Ripping All".
