The X40 Official Firmware Release Note (R0063)

① **Release date : June 14th, 2017**
② **The version of updated firmware : R0063**
③ **Refer to the below for the contents updated from R0060 to R0063**

We are very sorry as there was a big bug at the X40 firmware R0060, which was released in June 9th of 2017. We cleared the bug successfully, and now would like to release new firmware X40 R0063 again

A. Improvement (From Firmware R0060 to R0063)

1 Cleared the bug that, no sound comes out from Analog Out if Volume out is set as 'Fixed', or if Volume out is set as 'Variable and Volume level is over a certain level like 87

-------------------- the below is R0060 Release Note ---

No new function at this release !!!

We would like to release X40 new firmware(X40_R0060) now once again, because a few major bugs were found out in the previous official version(X40_R0056), which was released in April 6th of 2017

B. Improvement (From Firmware R0056 to R0060)

1 Cleared the bug that, CD ripping doesn't succeed in case that CD metadata is not detected, but it looks just like CD ripping is doing properly
[NOTE] When CD metadata is not detected, you need to input 'album name' at minimum to go further for CD ripping properly

2 Cleared the bug that, 'Import to DB' for recorded files via Analog In, Aux In or Digital In doesn't work properly. It used to open 'Tag Edit Screen' repeatedly

3 Cleared the bug that, in playing TIDAL with MusicX app, X40 got frozen when pressing 'STOP' key at Now Playing Screen of MusicX app

4 Cleared the bug that, in increasing volume, volume goes down suddenly when it passes volume level 50

5 Cleared the bug that WebInterface doesn't work when selected Synology NAS as MusicDB storage

6 **Clear the bug that, when a short recorded file(below 15 seconds) is being played, MENU key doesn't work properly.**

7 **Improved to display German text on the screen properly**

Thank you very much !
