The N15D Official Firmware Release Note (R1203)

① **Release date : April 26th, 2018**
② **The version of updated firmware : R1203**
③ **Refer to the below for the contents updated from R1020 to R1203**

A. New Functions

1 Improvement of MusicDB structure

We improved MusicDB structure to handle better multi-album, 'Best of ' and not to change original song tag file when importing to DB. **Album name repetition is allowed.**
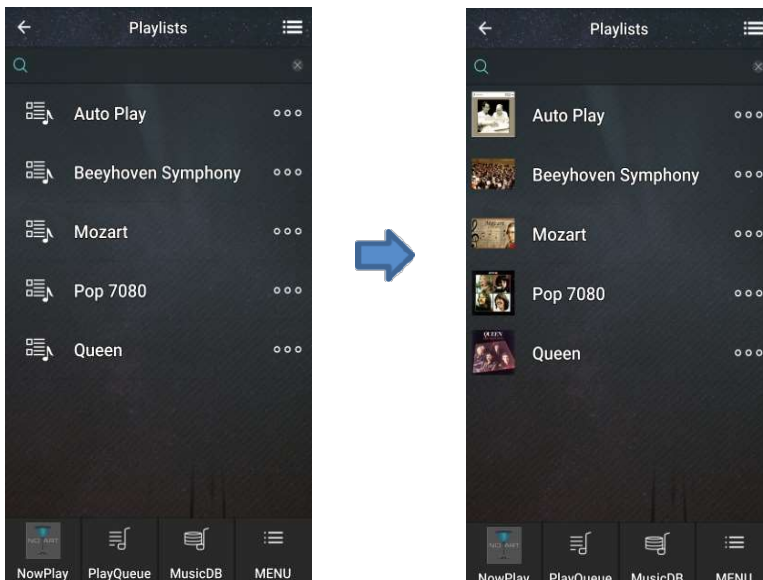

※ **NOTICE**
Your device may not work properly If you go back to previous firmware after updating your device with this new firmware, because MusicDB

* In importing at Browse mode

-. Basic concept : To make always new Album

-. If upper folder is same and Album names are same, they will be imported to same album just like multi-album if you select 'No' when questioned "Do you want to use folder name as album name?"
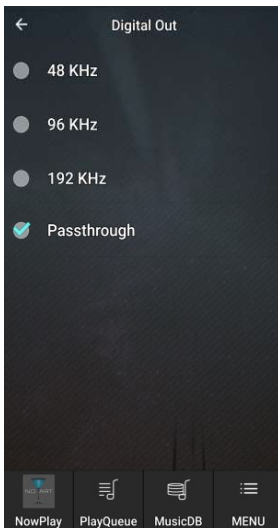

2 Improve to show Thumbnail art of Playlist
3 Changed list of iServices from Text to Graphic image

NOTICE
If you don't log In at SETUP for Qobuz, Napster, TIDAL and Deezer, each icon can't be selected

4 Added 'Passthrough' option at Digital Out of SETUP

5 To display 'No List' message when FAVORITE folder of Airable is empty

continued

B. Improvement

1 Upgraded Samba Network Protocol to version 4.7.4

2 Always check if it's possible to connect to internet when go into iService icon

3 Improved network setting with DNS Server and Static IP

4 Improved to check integrity of key table(album, artist, composer, etc) when editing album or song at WebInterface

5 Improved 'playing time delay phenomenon' in playing Spotify

6 German, Italian and Dutch OSD languages are updated

7 Improved that MusicX app should find device properly

8 Cleared the bug that, in Airplay mode, the device may get crashed sometimes when a phone gets a call or other phone tries accessing to the device

9 Cleared the bug that strange message comes out when try searching cover art by Qobuz in WebInterface

10 Improved that you could use Napster service in WebInterface

11 Improved that device should display DSD file information properly like DSF(or DFF) DSD128 on the Meta Info memu.

12 Clear the bug that certain aiff files don't play properly or don't show cover art after imported to MusicDB

Thank you very much!
